How HONG KONG TRADE Notes due 2031 work?

Main features

It is an investment with an algorithm with twelve different flexible strategies, created especially for investors who want to earn significant percentages. Diversifying the risk even between the different strategies allows you to take advantage of all market situations. The operating principle is to minimize the relative drawdowns and the parameters can be varied several times during the trading. The risk is mitigated by continuous monitoring of the person and, in some cases, also by direct manual trading.

Coupon payment

Every month as per the dates indicated.

Possibility of Early Repayment

By the Issuer on the dates indicated.

Conditional capital protection at maturity

Low minimum investment:

Possibility to trade even a single unit (1 Note).

COUPON CALCULATION	On each Redemption - and Coupon Observation Date and the Final Reference Valuation Date, the Underlying Return will be calculated for each Basket Constituent as follows: <i>(Reference Level – Initial Reference Level) / Initial Reference Level</i>
EARLY REDEMPTION SCHEDULE	31 December 2022 – 100%; 31 December 2023 – 100%; 31 December 2024 – 100%; 31 December 2025 – 100%. 31 December 2026 – 100%; 31 December 2027 – 100%; 31 December 2028 – 100%; 31 December 2029 – 100%. 31 December 2030 – 100%.

WARRANTY	Possibility of insuring the capital with a primary insurance company.

Risk Protection

With a balance of dynamic trading strategies, prudent risk management and exceptional liquidity, our trading program has consistently achieved interesting and consistent historical results.

Our success is achieved because we operate a series of clearly defined risk protection strategies, including:

1. Disciplined investment rules;
2. Strict asset control;
3. An investment philosophy of meticulous risk management;
4. All trading is constantly supervised by our risk executive;
5. Effective regulation;
6. Our experts execute our pre-defined and stringently managed strategy of diversification;
7. We combine hedging strategies (buying and selling of contracts of the same value in opposite directions at the same time) in order to constant mitigate our risks;
8. Based in one of the most well regulated, reputable and secure financial centers in the world.

Most trading programs scream sky high interest returns and are silent about risk. The truth is very few trading programs are 100% protected with capital insurance. In Suite Asset Management we value client deposits funds safety before high interest returns!

The world is a volatile and turbulent place with unexpected economic changes happening unannounced. The truth is unanticipated market turmoil can hit at any time, we therefore strongly caution clients to place the elimination of risk well ahead of the banking of profits. Some trading programs operate with considerable risk, promising very high returns per month, while exposing investors to total loss of all funds. Getting rich and then getting wiped out is not a sound investment strategy, which is why our trading programmes offer realistic returns and 100% capital protection. We never want our clients to ever lose their initial invested deposit or capital.

Let's grow your asset together safely in the trading program.
